To Whom It May Concern:

I've recently had the pleasure of working with Kenn Lucas for the past year, and recently had the unfortunate task of saying good bye.

I say unfortunate because Kenn was a valuable asset to our team, able to quickly produce quality, original artwork and solve technical issues even outside the initial scope of his duties.

He respects Best Practices, stays organized - even within massive Photoshop documents - and communicates quickly and directly.

His skill set ranges from the creative (Photoshop and the gamut of Adobe products) to technical (with at least abilities in HTML, CSS, JavaScript).

Lastly, he was able to take in feedback during formal reviews and focus attention in any area he was asked to improve, artistically, professionally or otherwise.

I am happy to chat with you via phone about my experiences working with Kenn and can be reached at 720.330.1323.

Cheers,
Geoffrey Poirier
