

June 1, 2000

(re-typed from paper copy)

Dear Sir or Madam,

I had the great pleasure in being the project manager on a project with Kenn Lucas in the spring of 2001. During this time I came to realize how much talent Kenn has in graphic and web page layout. As a contractor Kenn was able to quickly add to the project and to our team to help us migrate a Visual Basic application to a web based application. Kenn's responsibilities included HTML coding, graphic design, screen layout and JavaScript. Without Kenn's help our successful project would have had a great chance of failure.

Kenn also possesses a great work ethic. On several occasions Kenn would work late or take work home with him to complete. Like most IT projects, ours had a very tough timetable. Kenn made it possible to achieve this goal.

Kenn was also a great asset in assisting our junior staff members with technical issues. He was always helpful on all technical levels to our staff.

In closing, I would strongly recommend Kenn Lucas to any future employer that is seeking a person with HTML, Graphic Design or Screen Layout Skills. He is an asset to any web project.

Sincerely,

David Moriarty
